◦ HOBBIES ◦

Basketball, Travelling

👤 PROFILE

I am a certified Software Engineer specializing in Android and web applications. Over my university years at UOI, Object-Oriented Programming and Algorithm's Efficiency got my attention. Since then, I've worked on many projects as a freelancer. Recently, I finished my duty at the Greek Army as a Private Software Developer contributing code and maintaining web apps. I also received a Letter of Recommendation from the Greek Army due to my excellent performance and work ethic under stressful situations. Now I'm studying the MERN stack, so I can expand my knowledge to the web applications field. Using the above technical skill set combined with my problem-solving and fast learning abilities as well as team player attitude and my constant need to accomplish the highest standards, I am able to add value and contribute to the company's achievements where I'll work.

🎓 EDUCATION

Master of Computer Science and Engineering, University of Ioannina, Ioannina, GR
September 2015 — September 2020

Bachelor of Computer Science and Engineering, University of Ioannina, Ioannina, GR
September 2015 — September 2020

📁 EMPLOYMENT HISTORY

Software Developer at Greek Army, Alexandroupolis, GR
November 2021 — August 2022

- Built, deployed and maintained web features using mostly the MERN stack.
- Development of Desktop applications deployed in Linux machines, using Java 11 and JavaFX.
